

## Quick Installation Guide

## TINJ-101-M12

## EN50155 Industrial PoE Injector

## Introduction

The TINJ-101-M12 is a PoE injector designed for industrial environments, especially for rolling stock, vehicle, and railway applications due to its EN50155 compliance and M12 connectors. The TINJ-101-M12 with one 10/100Base-T(X) port meets IEEE802.3at/af standards and is equipped with intelligent detection function. As a result, the device will not turn on power until it detects a valid PoE signature from the connected PoE device. This function can protect non-PoE compliant equipment connected to the same Ethernet cable from damage and allow only IEEE 802.3at/802.3af compliant devices to be powered by the PoE injector. The PoE injector can function with any P.D. equipment which is fully compliant with IEEE 802.3at/802.3af PoE standards.

## Package Contents

The product is shipped with the following items. If any of these items is missing or damaged, please contact your customer service representative for assistance.

Contents	Pictures	Number
TINJ-101-M12 or TINJ-101-M12-24V		1
QIG		1

## Preparation

Before you begin installing the device, make sure you have all of the package contents available and a PC with Microsoft Internet Explorer 6.0 or later, for using web-based system management tools.

## Safety &amp; Warnings

- Elevated Operating Ambient:** If installed in a closed environment, make sure the operating ambient temperature is compatible with the maximum ambient temperature (T<sub>ma</sub>) specified by the manufacturer.
- Reduced Air Flow:** Make sure the amount of air flow required for safe operation of the equipment is not compromised during installation.
- Mechanical Loading:** Make sure the mounting of the equipment is not in a hazardous condition due to uneven mechanical loading.
- Circuit Overloading:** Consideration should be given to the connection of the equipment to the supply circuit and the effect that overloading of the circuits might have on overcurrent protection and supply wiring. Appropriate consideration of equipment nameplate ratings should be used when addressing this concern.

## Dimension

## Panel Layouts

1. Data input port
2. PoE port
3. Power input port
4. PoE status LED
5. Power status LED

## Installation

## Wall-mount

The device can be fixed to the wall. Follow the steps below to install the device on the wall.

**Step 1:** Hold the device upright against the wall

**Step 2:** Insert four screws through the large opening of the keyhole-shaped apertures at the top and bottom of the unit and fasten the screw to the wall with a screwdriver.

**Step 3:** Slide the device downwards and tighten the four screws for added stability.

Instead of screwing the screws in all the way, it is advised to leave a space of about 2mm to allow room for sliding the switch between the wall and the screws.

## Network Connection

The device provides one data input port and one PoE data output port in M12 connector. According to the link type, the device uses CAT 3, 4, 5, 5e UTP cables to connect to any other network devices (Pcs, servers, switches, routers, or hubs). Please refer to the following table for cable specifications.

## Cable Types and Specifications:

Cable	Type	Max. Length	Connector
10BASE-TX	Cat. 3, 4, 5 100-ohm	UTP 100 m (328 ft)	M12
100BASE-TX	Cat. 5 100-ohm UTP	UTP 100 m (328 ft)	M12

For pin assignments of the LAN ports, please refer to the following tables.

## 10/100 Base-T(X)

Pin	M12 Input (Data Only)		M12 Output (Data and Power)	
	Symbol	Description	Symbol	Description
1	Rx+	Data Receive	Rx+ (Vdc-)	Data Receive and Feeding power(-)
2	Tx+	Data Transmit	Tx+ (Vdc+)	Data Transmit and Feeding power(+)
3	Rx-	Data Receive	Rx- (Vdc-)	Data Receive and Feeding power(-)
4	Tx-	Data Transmit	Tx- (Vdc+)	Data Transmit and Feeding power(+)

**Note:** pins 1 and 3 (-Vdc) should not be shorted to ground

## Power inputs

The device provides one set of power supply using the M12 5-pin female connector on the front panel. Please refer to the following figure for pin assignments.

## Configurations

After installing the switch and connecting cables, start the device by turning on power. The green power LED should turn on. Please refer to the following table for LED indication.

LED	Color	Status	Description
Power	Green	On	Power is on
PoE	Blue	On	PoE device is detected
		Blinking	Detecting PoE device
		Off	No PoE device is detected

## Specifications

ORing Switch Model	TINJ-101-M12	TINJ-101-M12-24V
<b>Physical Ports</b>		
10/100Base T(X) with P.S.E. Ports in M12 Auto MDI/MDIX	<b>1 x M12 connector (4 pin D-coding)</b>	
10/100Base T(X) Ports in M12 Auto MDI/MDIX	<b>1 x M12 connector (4 pin D-coding)</b>	
<b>Operating Voltage</b>		
Input Voltage	50 ~ 57 VDC on 4-pin terminal block	12 ~ 57 VDC on 4-pin terminal block
Output Power	50V / 600mA, 30 Watts max.	
<b>Protection</b>		
Short Circuit Protection	Present	
Over Load Protection	Present	
<b>Physical Characteristic</b>		
Enclosure	IP-40	
Dimension (W x D x H)	88.9 (w) x 40 (D) x 178.2 (H) mm (3.5 x 1.57 x 7.02 inch.)	
Weight (g)	385g	446g
<b>Environmental</b>		
Storage Temperature	-40 to 85°C (-40 to 185°F)	
Operating Temperature	-25 to 75°C (-13 to 167°F)	
Operating Humidity	5% to 95% Non-condensing	
<b>Regulatory Approvals</b>		
EMI	FCC Part 15, CISPR (EN55022) class A, EN50155 (EN50121-3-2, EN55011, EN50121-4)	
EMS	EN61000-4-2 (ESD), EN61000-4-3 (RS), EN61000-4-4 (EFT), EN61000-4-5 (Surge), EN61000-4-6 (CS), EN61000-4-8, EN61000-4-11	
Shock	IEC60068-2-27	
Free Fall	IEC60068-2-32	
Vibration	IEC60068-2-6	
Safety	EN60950-1	
<b>Warranty</b>	5 years
